

Reach your potential!

REACH tutoring takes a different approach to learning. We believe that learning should be a fun and enjoyable experience.

While covering all curriculum outcomes, we combine games and activities to assist not only childrens learning, but also their attitude towards it.

Enter at the front opposite the Franklins Arcade* or drop off/pick up at the rear access in Surf Lane.

Reading Encouragement

Learning to read can often be a difficult and frustrating experience. Reading Encouragement is a one to one specialised session to assist children with learning to read. We use a range of techniques to encourage reading and to make the learning process enjoyable. We combine knowledge of phonetics and letters to promote the exploration of books and learning. Our key to helping children learn to read is first helping them to enjoy books and encouraging them to want to read.

Mathematics

The mathematical world of numbers can become very daunting if it is not understood. In this one to three tutorial, children are given real life maths problems to suit their developmental needs. As they improve they are given more challenging work so that their potential can be reached. Concrete learning aids are used in these tutorials such as counters and geometrical shapes to help make the numbers on the page relate more to our everyday lives.

friendly qualified team

English

English tutorials can be utilised to enhance imagination and to improve writing skills and techniques. In a tutorial your child has the option of focusing on one of our three main topics, writing, spelling and comprehension. Writing goes through the different styles such as narrative, explanation, recount and exposition and shows children ways to write interesting and engaging pieces of writing.

Spelling explores the world of phonetics and the techniques that are used to be an accurate speller. This involves using the dictionary to find meanings of words that can in turn assist in learning to be a good speller.

Comprehension involves exercises of reading and retaining knowledge to answer questions, and also hearing information and being able to record that. We explore different techniques of answering questions and also memory exercises.

play with purpose

One on one tutoring:

One hour session: \$60
45 minute session: \$47
30 minute session: \$35
Tutoring in pairs: \$35 1 hour

Added information:

- When joining a ten week (term block) tutorial, your child will be originally assessed to identify their strengths, weaknesses, likes and dislikes. They will then receive a progress report that is completed at the end of each tutorial.
- Tutoring can be done for children from the year before school to Year 6.

Thank you, I look forward to a bright future of learning and fun!
